

Meetings Maker Lite

by Groups360

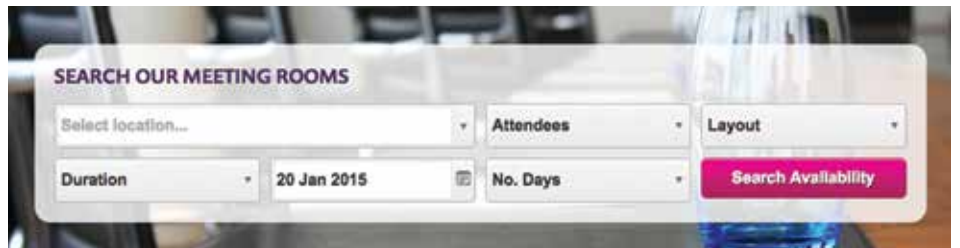

Real-time meeting and group booking system

meetingsmaker.com

The hotel industry's most widely used meeting booking and payment system is now available as a low-cost downloadable product, delivered as software as a service (SaaS).

The range of Meetings Maker Lite products includes Basic, Premium and Professional as well as a free-for-life version. The new Lite versions are suitable for individual properties and small to medium size hotel groups.

The cloud-based software is easy to download and can be set up in just 30 minutes. Once up and running Meetings Maker Lite will allow customers to search real-time availability of your hotel's meeting rooms, view live pricing and make a booking. With higher versions customers can even complete a secure online payment for the booking by credit or debit card.

The system is proven to provide a significant competitive advantage to hotels, not only boosting meetings revenue, but also cutting inquiry handling costs by more than 50%.

Why not download the free-for-life version of Meetings Maker or take a 30 day trial of the, more powerful, Premium version and transform your meetings business today.
